(704) 839-1311

720 bilyeu st.
apt. 304
raleigh, NC
27606

coding

C++/CUDA
MATLAB
Python
L^AT_EX
C#
C

languages

native:
english
skilled:
spanish
basic:
italian
french
german

interests

GPU programming, machine learning, computer graphics

education

- 2017-2018 **M.S.** candidate in Electrical Engineering North Carolina State University (NCSU)
non-thesis, courses in data science, machine learning, random processes,
digital image/signal processing, linear algebra, computer architecture
- 2012-2017 **B.S.** summa cum laude (3.84 GPA) NCSU
Electrical Engineering, *specialization in Computer Engineering*
- 2008-2012 **high school diploma** Independence/Butler High Schools
score of 5/5 on six A.P. exams, Academy of International Studies student

experience

- 2016-2017 **independent research** NCSU Electrical Engineering Department
GPU acceleration of algorithms using NVIDIA's CUDA/C++, under guidance of
Dr. Dror Baron. ~28x speedups achieved with a Tesla K80 for multi-processor
approximate message passing (MP-AMP)
- 08-12 2014
06-12 2015 **cooperative education internship** Analog Devices, Inc., Greensboro, NC
worked on communications infrastructure team under John Oates, Systems
Engineer. Accompanied project through three hardware revisions. Moved
project forward with:
- improved software
 - program to present board capability to customers
 - automation suite to characterize performance of board
 - code maintenance (source control, refactoring)
 - improved hardware
 - maintenance and modification of surface mount PCB components
 - schematic changes (Cadence Allegro PCB Planner)

projects

- since 2018 **open source project contributions in python and C++** github
OpenMined is a homomorphically encrypted federated learning platform that
seeks to provide a secure and sustainable way of training neural networks.
- since 2017 **computer graphics in MATLAB and C++** instagram (some code on github)
each frame generated individually from mathematical basis; some work with
Google's search API in Python, as well
- 2017 **orthographic projection in MATLAB** ECE 592 project (digital image processing)
given a photo of a box and its closest corner in image, program finds faces of
box and projects to create 3-D model

2018	music review website in React (Javascript) a project built with friends to host all of our gratuitous opinions on music.	github
2016	internet of things (IoT) 'car' built a small remote-controlled car with various I/O devices to a Texas Instruments MSP430 Microcontroller, programmed in C	ECE 306 project (embedded systems)

presentations

08 2017	poster at undergraduate research symposium GPU implementation of row-wise approximate message passing (AMP) speedup of ~28x achieved with CUDA/C++	
04 2017	poster at senior design day Keg It Out: an IoT beer monitoring service for brewers to optimize distribution culmination of the Engineering Entrepreneurship Program for senior design	

volunteering

2017	cooking & serving food at day-shelter served food to some of Raleigh's homeless and at-risk population	love wins ministries
2016	family STEM nights facilitated interactive engineering experiments for K-12 students	local elementary & middle schools
2016	peer tutor for Eta Kappa Nu (HKN, ECE honor society) offered free help to undergraduates in ECE courses	on campus
2013-2016	SOUL Garden volunteer student-run garden which donates some food to those in need	on campus
2015 & 2016	annual Service Raleigh volunteer yearly event to bring many volunteers to the Raleigh area	Raleigh

extracurriculars

2016-2018	facilitator/host, Wake Up Raleigh mindfulness group with weekly events, community engagement	
2013-2015	president, Buddhist Philosophies Club organized events, led discussions, community engagement and leadership	
2016-2017	Co-Op ambassador informed students about the Co-Op program at State; opportunity to demonstrate leadership and character	
since 2008	poetry & music writing published in the 49 th -51 st editions of NCSU's literary magazine
